

Tirthesh Patil

TECHNICAL PRODUCT MANAGER · FINTECH & PLATFORM PRODUCTS

Navi Mumbai, MH | tirthesh18@gmail.com | +91 9518750662 | linkedin.com/in/tirthesh-patil

PROFESSIONAL SUMMARY

Technical Product Manager with 2+ years of experience building and scaling fintech platforms across payments, AI, and data systems at Jio Financial Services. Owns high-throughput systems handling **180K+ daily transactions** and AI platforms serving **65K+ daily prompts**. Experienced in API integrations, system design, and data-driven product decisions within regulated environments (RBI, NPCI).

CORE COMPETENCIES

PRODUCT & STRATEGY: Product Strategy · Roadmapping · KPI Design & Tracking · Data-Driven Decision Making · Stakeholder Management · Cross-functional Leadership

SYSTEMS & DATA: API Design & Integration · System Design · Scalability & Performance · Data Instrumentation · SQL · Funnel Analysis

DOMAIN EXPERTISE: UPI / NPCI · RBI Regulations · Account Aggregator (AA) · Consent Management · FinTech Platform Architecture

AI & TOOLS: RAG Systems · Agentic Workflows · Prompt Engineering · AI Product Integration · JIRA · Postman · Google Analytics

PROFESSIONAL EXPERIENCE

Product Manager — Jio Platforms Limited Dec 2024 – Present
JFS SuperApp · Little Nest · Navi Mumbai, MH

- Prioritized high-impact product initiatives across payments, AI, and marketplace verticals, balancing regulatory constraints, engineering bandwidth, and revenue goals.
- Owned and scaled the **UPI payments vertical** — drove NPCI compliance certification, multi-bank API integration, and real-time monitoring → scaled volume to 180K average daily transactions at 99%+ uptime with 85%+ successful payment processing.
- Defined the **Consent Management compliance vertical** — authored RBI-compliant AA data-sharing specifications and drove fintech vendor integration → delivered consolidated financial views to thousands of users monthly.
- Drove the **analytics platform implementation** (Google Analytics + internal dashboards) — defined KPI frameworks tracking transaction volume, adoption, and drop-off rates → drove double-digit improvements in key engagement metrics.
- Led key product initiatives for the **AI-powered financial marketplace** (FDs, loans, credit cards, gold) — defined product requirements and led third-party lender API integration → generated ~20% cross-sell revenue uplift post-launch.
- Owned the **JFS Agentic Chatbot** — led iterative roadmap execution and executive stakeholder alignment → scaled usage to 65K prompts daily within the JFS App.
- Led 0 to 1 build of the **Little Nest platform** (mobile + web) — drove full ideation-to-launch cycle with senior enterprise stakeholders → achieved a 75%+ reduction in manual operations with hundreds of automated daily transactions.

Team Lead & Associate Product Manager — Jio Platforms Limited Dec 2023 – Nov 2024
Government Engagements · Asset Management System · AI Chatbot Solutions · Navi Mumbai, MH

- Scaled execution across a **60+ member cross-functional team** spanning QA and operations — facilitated agile ceremonies and streamlined workflows → drove a ~50% improvement in team velocity across concurrent product tracks.
- Delivered the **RAG-based multilingual AI chatbot** for a government initiative — led requirement documentation reviews and coordinated QA cycles → scaled product to 10K DAU across 12 languages.
- Improved product delivery efficiency through backlog refinement and sprint planning across multiple enterprise tracks — improved requirement clarity and feasibility → reduced development rework by ~20% while keeping delivery tightly aligned to business goals.

Frontend Web Developer — Digital Edge Technologies Apr 2019 – Jun 2019
Mumbai, MH

- Leveraged MERN stack expertise to improve technical feasibility discussions and reduce engineering iteration cycles — collaborated directly with clients to translate requirements → shipped cross-browser-compatible product features.
